Please take a few minutes to setup your new, more secure, login process.

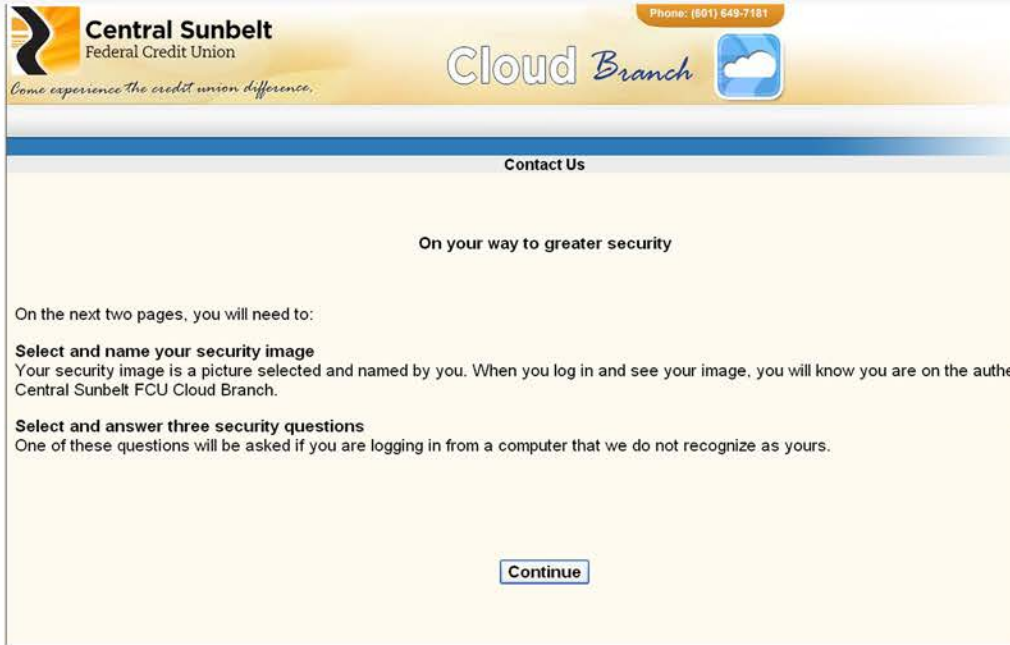

How is this new login process more secure?
Member Login Protection blocks attempts to access your accounts from computers that we do not recognize unless one of your security questions is correctly answered.

Do I have to answer one of my questions every time I log in?
No. At the end of this process, you will be given the option of certifying the computer from which you are logging in. We certify your computer by placing a [recognition cookie](#) on it. You will not be asked a question when logging in from a certified computer.

The enhanced login setup is complete!

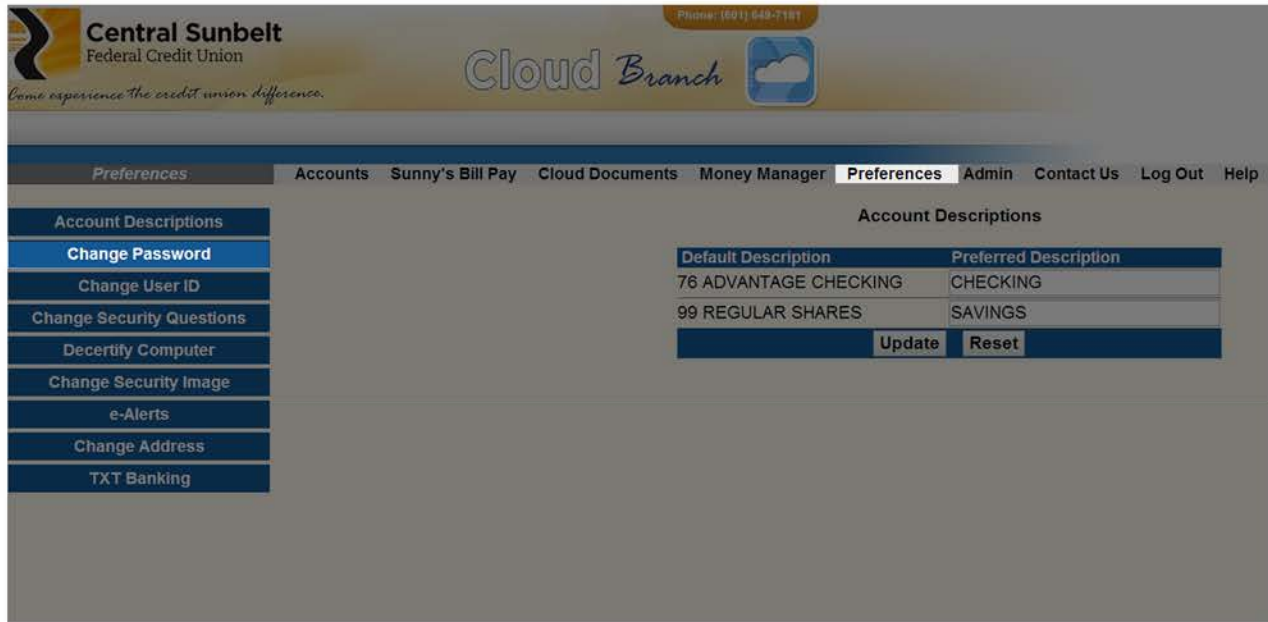

The next time you log in you will see the image and name you selected. Do not enter your password until you see the image. Once you enter your password, you will be granted access as usual if you certified the computer, or you will have to answer a challenge question if you did not on a computer that you certified.
